Tailoring ART

*Different People,
Different Needs*

Invitation

Roche Satellite Symposium
6th International Congress
on Drug Therapy in HIV Infection,
Glasgow, UK

Sunday 17 November 2002
15:30–17:30
Clyde Auditorium, Scottish
Exhibition and Conference
Centre (SECC), Glasgow

Dear delegate

Now in its third decade, the global HIV/AIDS pandemic continues to evolve in ways that we could not have predicted when the disease was first recognized in the early 1980s.

Although highly active antiretroviral therapy (HAART) has dramatically improved the outlook for many people living with HIV infection, the emergence of new clinical dilemmas, and major changes in epidemiology and transmission patterns, means that we must constantly monitor and update our prevention and treatment strategies.

To stay one step ahead of HIV, we must recognize that no two people with HIV infection are the same. Each individual has different treatment needs, based on factors such as their age, gender, lifestyle and personal circumstances – as well as the properties of the virus with which they are infected and the co-existence of other diseases or infections.

For these reasons, it is essential that we tailor antiretroviral therapy for each patient that we treat, rather than simply apply a 'one size fits all' approach to their management.

It is therefore with great pleasure that we invite you to attend the satellite symposium 'Tailoring ART: Different People, Different Needs'. The aims of this discussion forum are to highlight the diverse treatment needs of our patients, and to provide timely information that will assist in making difficult treatment decisions in very different clinical situations.

We look forward to seeing you there.

**Ceppie Merry
and Anton Pozniak**
Co-chairs

PROGRAMME

Sunday 17 November 2002

15:30–17:30

Clyde Auditorium, Scottish Exhibition
and Conference Centre (SECC), Glasgow

Co-chairs:

Ceppie Merry, Ireland

Anton Pozniak, UK

Introduction:

Ceppie Merry, Ireland

A TAILORED FIT –

Viracept and the requirements of defined patient populations
Sharon Walmsley, Canada

MEASURING UP –

Clinical performance of boosted saquinavir in diverse
treatment groups
David Cooper, Australia

WILL IT SUIT ME?

The importance of safety and patient acceptance
to long-term success
Anton Pozniak, UK

NEW THREADS –

- 1 Therapeutic profile of enfuvirtide in treatment-experienced patients
Manuel Battegay, Switzerland
- 2 Weaving enfuvirtide into patients' lives
Nicky Perry, UK

Selected slides from this
symposium will be available from
the Roche exhibition stand
